

Figure 6: Bedrock feature near the Mendenhall Glacier. Note glacier to the right.

Figure 7. Large rock in Yellowstone National Park, Wyoming.

Photos by G. Vorwald

13. a. Name the feature in Figure 6.

b. Explain how a glacier formed this feature.

14. a. The large rock in Figure 7 is metamorphic; most other rocks in the valley are volcanic in origin. What is the name given to a rock like this?

b. How did this rock end up in the middle of this valley?
